

Slideshow checklist

Getting started

- ☐ Decide if you are working alone or with a partner.
- ☐ If you would like to use a different platform than google presentation clear this with the teacher.
- ☐ Start your presentation

Things to include in your presentation

- ☐ What are complex and imaginary numbers?
- ☐ How are they represented in an equation?
- ☐ What are the rules for solving an algebraic equation that includes complex numbers?
- ☐ If a quadratic equation results in a complex number what does that mean about the equation?

Aspects of your slideshow

- ☐ Be sure there are no spelling mistakes in your presentation
- ☐ Be sure pictures are included and make sense
- ☐ Be sure that all math is correct
- ☐ Be sure to be creative, and have fun with your project
- ☐ Be sure slides are not too "wordy"

Presenting

- ☐ Be prepared
- ☐ Know what you want to say
- ☐ Be creative and have fun
